DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 110-112 are withdrawn in view of the newly discovered reference(s) to U.S. Patent no. (2,479,472) issued to Coplon. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 44 and 110-112 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coplon (2,479,472) in view of Lund et al. (4,682,310). Coplon '472 discloses a container for storing an item, comprised of: a first container portion (pocket 14) having a sidewall that defines a first interior space; a second container portion (pencil retainer 17) defining a second interior space that is configured to store a writing instrument (pencil 21), the second container portion being positioned on the side wall of the first container portion (see Figure 2 and 7 embodiments); the first container having a closure (closure flap 22) attached thereto by a hinge, the closure being movable between a closed position on the container and an open position permitting access to the first interior space; and a pair of eyeglasses (spectacles 15) stored within the first container portion. Coplon '472 does not teach a timepiece attached to the interior of the container. Lund '310 discloses a container having a timepiece integrally associated with

the interior of the container, in which the incorporation of the timepiece into the container does not significantly affect either the configuration or usage of the container. The timepiece is visible when the container is opened, and upon folding the container, is disposed on the interior thereof. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a timepiece to the closure of Coplon '472 as taught by Lund '310 to provide the consumer accessibility to time.

Response to Arguments

4. Applicant's arguments with respect to claims 44 and 110-112 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are containers analogous to applicant's instant invention.
